Determine the consistency of the white balance in the photos. New New Iphone Selecting tool to selectively apply exposition, brightness, clarity and other settings to a specific part of a photo. Lightroom on iOS now features a high-level collection called Lightroom photos that displays all your photos organized by timeline. The Lightroom for Mobile automatically applies the camera's profile to your photos based on the image metadata. Tom curve mode â € Ã. In the notification bar of your Android device, tap the USB connection notification that appears after connecting your camera. Copyright. Lightroom notifications appear in the lower right corner of the user interface on the connected monitor. View these features: CÃ ¢ mere templates supported Lens Lens Profiles Lightroom CC 2015.4 / Lightroom 6.4 Limit distortion When viewing panoramas ã, this feature is available only in Lightroom CC. New in this Lightroom version for Android Mobile Lightroom application layout for Android Mobile was optimized for a large screen viewing experience to support the Samsung Dex. Support for new cases and lenses. 3D touch support for sensitive application to enhancements on devices that support 3D touch. Merge the Multiple Exposure images to create a 32-bit floating-point DNG file â € œ "your raw raw HDR image. Lightroom CC 2015.5 / Lightroom 6.5 Support for new cans and enhanced lenses In this Lightroom CC 2015.5 / 6.5 / 6.5 support deploys support for new cans and lens profiles. Now you can view slide presentations in the ratio rate of the screen or in the desired exit ratio (16x9 or 4x3). Button Capture I. For example, adjust the white balance, display and contrast from the photo on the Basic Mode Panel. General Improvements of Stability. With the new Pro mode, your iPhone and Lightroom now is your DSLR camera. After switching to the For touch work, you don't have access to the controls available in Lightroom for mobile and more. In Light, Color, Color, The effects edit menus, user interface ³ for Curve, HSL (renamed MIX), and Split Tone have been updated. For additional details, see Edit photos. For a complete list of supported cameras, lenses, and lens profiles, refer to these features: Supported Camera Models Supported Lens Profiles Problems fixed in this version of Lightroom Fixed the compatibility warning of the incorrect Camera Raw plug-in displayed in Lightroom when you are not Edit in Photoshop'. and other settings for a specific part of a photo. Now you can't apply lens µ to all photos or just raw pictures during import by turning on the import setting in the sidebar. In the Develop section, select Use Smart µViewing instead of Image Editing Originals. The Panorama Merge Preview dialog box now features a Boundary Warp (0-100) slider configuration. Click OK and restart Lightroom. µ Lightroom now offers a unified experience that lets you import photos from your computer, digital cameras, ³ cards and more. New in this version of Lightroom for Apple TV Pass along the right edge of the touch surface of the Apple TV remote control to quickly scroll through your Lightroom photos and videos. In the Develop ³, click the Red-Eye Running tool icon. By default, Lightroom Photo Paste is selected. If you don't have a Photoshop Elements cat on your computer, you can also import it quickly into Lightroom. Rate and tag your photo. Directly access photos from your Camera Roll. G. New in this version of Lightroom Lightroom allows you to not easily merge photos from a landscape into a panorama of taking the heat. Choose DNG to take pictures in the raw format Digital Negative (DNG). Publish and view in their photos that are part of a shared collection. Click Pet Eye and drag from the center of the eye to select the pupil. New Show Featured Featured Feature in the application's camera that shows overexposed areas before capture. For example, you may want to lighten a face to make it stand out in a portrait. You can set a timer to capture photos automatically or capture photos in fast mode. Support 3D touch on iPhone 6S/6S Plus. Available only for Creative Cloud Members local settings allow you to selectively apply exposure, brightness, clarity, and other adjustments to a specific part of a photo. (Android) which starts with version 2.3, Lightroom for mobile (Androom) supports HDR mode only on Samsung S7, Samsung S7 Edge, Google Pixel and Google Pixel XL mobile devices. After your trial has expired, you will continue your access to all the editing features for free on your smartphone or tablet. Lightroom for Mobile (Android) now features a new pro mode that provides more control over the camera in the app. As you move the slider to the right, Lightroom reduces the amount of fog or fog visible in the photo. Now you can import photos directly (including RAW images) from a connected camera in Lightroom for mobile. Displays image thumbnails segmented based on the folder structure on your mobile device. View these resources: Supported Camera Models Lens Profile Issues Fixed in this Version of Lightroom Lightroom for Mobile | iOS 2.7.3 | April 2017 This version of Lightroom for mobile iOS releases support for new cameras and lenses, bug fixes, and performance improvements. (Left) Classification of a photo. H. CMYK exposure lock bracket while soft-proof. In the camera module, tap the capture file format (DNG, by default) badge at the top of the viewfinder to switch between the JPEG and DNG capture options. Compatibility fixes for MacOS Sierra compatibility settings have been made in this Lightroom login, so you will need to run smoothly when you do not upgrade to MacOS Sierra. See this technology note for more details. Adjust shades. hues. Color / B & W mode Using the pen S to set a particular hue while working in Color / B & W mode, press the S Pen button and hover over any tint to select it. Now you can save the lightroom for mobile photos (Android) in your device gallery in your native resolution on the highest quality available. In the library's module, change to people's viewing and choose to find faces in your catalog. Lightroom 6.14 | December 2017 Lightroom 6 was discontinued and it is no longer available for purchase at Adobe.com. Tap Add to at the bottom of the screen. The divided vision of iOS 9 and slide on multitasking improvements make Lightroom for Mobile & iPad for the best combination for moving photographer. Settings for a filter brush Improvement in this Lightroom version, you can now adjust the amount of panoramic and zoom using a convenient slider. 2015.x / 6.x Lightroom CC & Lightroom releases for October 2017 and later Lightroom Classic releases are now available! See New Resources Summary. Lightroom's 2015.x / 6.x releases launch several new features and enhancements that enrich your digital image experience. Mobile lightroom | Android 2.3.4 | May 2017 This Lightroom for Mobile Android launches HDR support in Samsung S8 and S8 + mobile devices, support for new cases and lenses, and bug fixes and performance improvements. A new size of -visualization called auto is available. For more information, see Merge Photo HDR. New redesigned capture interface in this Lightroom version for iOS mobile (iPhone and iPad) The redesigned capture interface now allows you to capture photos in two modes - Auto and Pro. You can also specify a layout projection. Ã ¢ â € "or let Lightroom choose the appropriate projection automatically. After the impairment conclusion, you can clear the notification bar notification. Apply lens corrections, lens, Profile Corrections and Copyright ã, New In this Lightroom for Mobile (Android) Lightroom for Mobile (Android) now allows you to apply lens profile corrections, CÃ ¢ mere profile corrections and copyright metadata in your photos. Lens corrections. Lightroom suggests names for similar photos. You can also use the keyboard shortcuts supported by the mobile lightroom. Set ISO O. When you apply 100% zoom (1: 1 mode) in the module to develop, the Lightroom switches to originals even if the preference to use intelligent views instead of originals for image edition is enabled. Best export photos in complete resolution. You can customize several configurations for these brinces. Now take color control to the next level with a complete function curve tool, allowing access to RGB as well as red, green and blue color channels in your photo. Shooting predefinations are available only for 64-bit devices such as iPhone 5S and posterior and iPad Air and later. An option to allow you to do this is available in effects on copying, synchronizing and new predefined dialogues. Lightroom for Apple TV 1.0 | July 2016 You can now install Lightroom for Apple TV in your Apple TV (4th generation) to view your photos and lightroom collections loaded in the cloud and enjoy slide presentations on your TV. You can go through your collections to quickly find the photo you are looking for or expand in 200% in your photos to view all the details on the big screen. If you make changes to your photos or collections on the Lightroom Desktop, Lightroom for Mobile or Lightroom on the Web while the Lightroom application for Apple TV is running, you can synchronize the latest editions Using the option to recharge collections in configurations. Iphone 7 and iPhone 7 Holder Optimized for iPhone 7 Support for iPhone 7 Plus Dual Lens Camera Improved color, lens and street profiles for iPhone 7 and 7 Plus DNG files Bug µ and performance improvements Lightroom CC 2015.7/Lightroom 6.7 6.7 , Gnizinagro ylkciuq uoy teg, erom dna, troppus erutseg devorpmi, retsaf sotohp tropmi, reisae snoitcelloc elpitlum ot sotohp ddA .devomer secnereferp steserP moorthgiL ni detseggus spets dnuorakrow eht wollof, sotohp ruoy no secnereferp devomer eseht htiw detaicossa sgnittes poleved eht ylppa oT etihW dnA kcalB oT gnitrevnoC tsriF nehW xiM otuA ylppA tnemtsujdA enoT otuA ylppA:) sgnitteS poleveD tluafeD rednu (bat steserP eht ni eromyna elbaliava ton era secnereferp gniwollof eht, golaid secnereferP eht nI Ã Ã .eromyna elbaliava eb ton lliw dna ebodA yb devomer neeb evah secnereferp moorthgiL owt, 7.6 moorthgiL / 7.5102 CC moorthgiL htiw gninnigeB .BÃ Ã aremac ni deggulp eht fo emaN .ppa eht tuohguorht stnemevorpmi ytilibasU .kcilf uoy sa noitceles tnerruc eht uoy gniwohs sraeppa yalrevo galf A .sotohp ruoy fo thgirypoC dna, noitpaC, ELTIT EHT EGNAHC .LENAP MROFSNART WEN EHT OTNI LENAP SNOITCERROC SNEL EHT MORF DEVOM NEEB WON EVAH) TCEPSA DNA, ELACS, ETATOR, LATNOZIROH, LACITREV (SREDILS lortnoc mrofsnart launam eht dna) lluF, otuA, lacitreV, leveL (sedom thgirpU gnitsixe ehT Ã Ã .slatnoziroh dna slacitrev gnigrevnoc htob tcerroc ot sediug ruof ro eerht ward ro, slacitrev gnigrevnoc tcerroc ot gnidliub eht fo segde eht no sediug owt ward nac uoy, elpmaxe roF .evitcurtsednon si otohp eht no deilppa porc eht, yalrevo oitar porc yna hguorht toohs uoy nehW .gnimooz dna gninnap laminim sesuac woL ot redils eht gnitteS .CÃ Ã snoitpo hsalf aremac-nO .lenap secivreS hsilbuP eht ni tesotohp kcotS ebodA eht ot weiv dirG eht morf sotohp gard neht, moorthgiL dna) /moc.eboda.kcots.rotubirtnoc //: sptth (latrop rotubirtnoC kcotS ebodA neewteb noitcennoc a hsilbatse ot slaitnederc tnuocca duolC evitaerC gnitsixe ruoy esUÃ Ã .kcotS ebodA ot moorthgiL MORF YLTCERID SOTOHP RUOY DNES WON NAC UOY, ELUDOM YRARBIL EHT NI LENAP SECIVRES HSILBUP EHT GNISU MOORTHGIL FO ESAELER SIHT NI WENÃ Ã, SREBMEM DUOLC EVITAERC ROF YLNO ELBALIAVA KCOTS EBODA OT SOTOHP Lightroom CC 2015.3/Lightroom 6.3 Previous import experience reinstated in this version of Lightroom Lightroom CC 2015.2/Lightroom 6.2 New unified import experience in this version of Lightroom This feature has been discontinued in Lightroom CC 2015.3/Lightroom 6.3 and is no longer available. See Use the Adaptive Wide Angle filter in Photoshop Help. This new interface displays the thumbnails of all the images stored on your ³ device. Capture Mode Switch (Auto/Pro) J. New camera and lens support Enhanced in this version of Lightroom for ³ (Android) devices For a complete list of supported cameras and lens profiles, see these features: Supported camera models Supported lens profiles General stability improvements. You cannot change the proposal of your photo later when you edit it. Apple Pencil support for sensitive improvements press. New in this version of Lightroom Working in the same way as the red-eyed run, the eye rush of esteemed animals in Lightroom helps to cure the unnatural colors of the eyes of esteemed animals captured in the photos. When viewing the panorama, you cannot choose to Auto-crop the merged image to remove unwanted areas of transparency. The generated raw HDR. files are large and require a lot of background processing, as explained above. In the Library or Develop ³, select the source images and choose Photo > Merge Photo > Panorama. When using the Camera in the application, you can now point your Camera to a neutral color (no color) surface in the scene and block the white balance. & Nbsp; Automatically sync slides for Music Set and lock exposure compensation. For more information µes, see Apply local adjustments. Configure Q Exposure Compensation. This wide range color space seroc seroc sa oÃsicerp moc matilfer moorthgiL on satief seµÃ§Ãide sa sadot euq odnitnarag ,BGRs seroc ed o§Ãapse o euq od seroc siam % 52 Photos. View how predefinations will be applied to your photo before capturing and enjoying the freedom to adjust the configurations after capturing with complete non-destructive features. Rate a photo to quickly evaluate a photo on the rate and revision panel, now you can back up or down half the screen on the left. After adding a mask, to access brush controls, select the Brush option next to New / Edit. To access these new noise reductions and affiance controls: (iPhone) on the edition panel in the magnifying glass view, touch Details icon at the bottom of the screen. (Left) Capture interface options in HDR mode on iPhone. Download on the Import Interface, select Photos that you want to import to the Lightroom to Mobile.TAP Add photos at the bottom of the screen. On the Lightroom Import screen that appears, choose a collection of your existing Lightroom collections in which you want to import the selected photos or create a new collection. When you resize the Lightroom application window on the connected monitor, the contents scale and thumbnails of the application accordingly. Adjust the Deha slider! A correction for a bug that caused a failure for some users when relaunching the Lightroom for the mobile application. For more information, see Create Panoramas. Corrections of CÃ ¢ mere profile. You can also add your copyright metadata to photos while importing to the lightroom for the mobile application, allowing the import configuration of the sidebar. The mask overlays for gradient and radial filters are now accessible using the same menu commands and keyboard shortcuts that display the mask overlapping for the local setting brush. New keyboard shortcut to cycle through vertical modes: control control + / ctrl +. Add selected photos e.g. you can reposition the adjustment brush strokes by selecting and dragging the edition pins. Set shutter speed p. You can switch to the touch workspace from anywhere in the app by clicking on the touch icon available only on touch-enabled devices such as the Surface Pro 3. This visualization is © Ãºtil when you want to edit a photo to make it look like a different reference photo. When viewing your photo in Loupe preview, you can use mouse scroll to zoom in and out. In Lightroom for mobile (Android), you can now set the desired exposure level for your photos by simply swiping the camera viewfinder screen in the app. Support for iPad Pro. New support P3 wide range color spacing AlÃ © m to support DNG format, Lightroom for iOS 2.5 mÃ³vel also © m adds support for the new wide-range P3 color spacing found on iPad Pro 9.7 and iPhone 7 and 7 Plus. Enhanced in this release of Lightroom CC 2015.8/6.8 implements support for new cameras and lens profiles. Local settings: White and black sliders are available only in Lightroom CC 2015.1. Local adjustment controls in Lightroom now include white and black sliders. Tap Add Photos in any preview now starts the new import interface in Lightroom for mobile (Android). Guided up to correct distorted perspective in photos is new in this version of Lightroom is only available in Lightroom CC. Overall stability improvements. Any edit made on the images will remain local on the device until © that you come in. Take a look at the new user interface, which was the beginning! The new Lightroom for mobile (Android) user interface For detailed information on the new editing experience, see Edit photos. For more information, see Face Recognition. Choose the source from which you want to import photos. For more information, see Work with Lightroom on mobile. Video playback support New in this release of Lightroom for Apple TV Lightroom for Apple TV Lightroom for Apple TV ,4.3.2 ,4.3.2 moc odnaÃemoC lev³Ãm diordnA arap moorthgiL od o£Ãsrev atsen ovoN Ã siev³Ãm sovitisopsid +8S gnusmaS e 8S gnusmaS me RDH arap etropuS .moorthgiL od sodazinorcnis soedÃv sues azudorper ªÃcov euq etimrep For mobile (Android) now supports HDR mode in Samsung S8 and Samsung S8 + mobile devices. All photos New synchronized photos in this Lightroom version in the library module, the new synchronized photo collection in the Catallog Panel displays all photos of the Lightroom (including those that are not part of any Collection) that are synchronized with Lightroom mobile customers. Support for new cans and enhanced lenses in this Lightroom Latch for Android Mobile for a complete list of supported cans and lens profiles, see these features: Lens Supported Lens Lens Supported Lightroom CC 2015.10 Lightroom 6.10 Support for new cans and reinforced lenses This Lightroom Lightroom CC 2015.10 / Lightroom 6.10 support for new cans and lens profiles. Release your creativity with free access to all Lightroom Capabilities as long as you want on your smartphone or tablet. The vertical guided tool in the new transformation panel allows you to elaborate to four guides (line segments) directly in the photo to indicate the image features to be aligned with horizontal or vertical axis. As you draw the guides, the photo is transformed interactively. The Capture Option DNG / JPEG L. Lightroom checks your image catalog to find potential faces for your review and confirmation. Improvements for web module Improvement in this Lightroom version, but from the classical HTML gallery, three new gallery styles are available: these galleries are designed to work with web browsers ¢ For desktop and mobile. After you set the exposure level, you can block the exposure compensation to your current value by tapping the icon () in the lower right corner of the capture interface. Shot-through predefinations. If you are running the Lightroom on Mac OS X, you can use the GPU Mac OS X version 10.9 or posterior.Ã ¢ New in this Lightroom Lightroom version allows you to quickly organize and find images using facial facials .ehlocse ªÃcov euq medro an etnemlaicneuqes sadizudorper o£Ãs saxiaf sA .sedils ed seµÃ§Ãatneserpa arap acisºÃm ed saxiaf 01 ©Ãta ranoicida edop ªÃcov arogA mooz e nap ed etnazilsed elortnoc o arap aicnªÃreferP .sairohlem e sosrucer sovon setniuges so a§Ãnal VT elppA rof moorthgiL od o£Ãsrev atsE 7102 ed otsogA | 1.1 VT elppA arap moorthgiL)7102 ed orbutuo(31.6 moorthgiL me sadaxif setnel ed sifrep ed seµÃtseuQ sodatropus aremÃc ed soledoM :sosrucer setse etlusnoc ,etnel ed sifrep e sadatropus aremÃc ed atelpmoc atsil amu arap moorthgiL od o£Ãsrev atsen sadaÃrofer setnel e saremÃc savon arap etropuS | 31.6 moorthgiL)7102 ed orbmezed(41.6 moorthgiL me sodaxif etnel ed sifrep ed samelborP sodatropus aremÃc ed soledoM :sosrucer setse etlusnoc ,etnel ed sifrep e sadatropus aremÃc ed atelpmoc atsil amu arap moorthgiL od o£Ãsrev atsen sadaÃrofer setnel e saremÃc savon arap etropuS .seµÃzar setnerefid me rariA .SOi ovitisopsid ues on GND WAR snegami ed arutpac a atropus arogA)SOi(eliboM arap moorthgiL erutpaC egamI WAR arap etropuS .amaronap ed megalcsem ed o£Ã§Ãarepo amu raicini arap odÃubirtaer iof)M + lortnoC / + lrtC(liam-e ed otof ed odalcet ed ohlata O .01 SOi on o£Ã§Ãucexe me SOi sovitisopsid sesse a odatimil ©Ã)SOi(eliboM rof moorthgiL ebodA olep odicenrof WAR snegami rarutpac arap etropus o ,otnatroP .sovitisopsid ed satsap ed o£Ã§ÃazilausiV .aifargotof amu me orieoven uo anilben ed edaditnauq a etnemua uo etnemlicaf aunimid ªÃcov euq etimrep moorthgiL O .1.5102 CC moorthgiL on sanepa levÃnopsid ¡Ãtse osrucer essE Ã 1.6 moorthgiL / 1.5102 CC moorthgiL moorthgiL od o£Ãsrev atsen odavirp ni-gulP ecivreS hsilbuP ecnaheB . potkseD moorthgiL on sadazinorcnis sadot saifargotof ed o£Ã§Ãeloc a euq somsem so o£Ãs)diordnA(ralulec arap moorthgiL on moorthgiL od sotof ed o£Ã§Ãazilausiv e ,)SOi(ralulec arap moorthgiL me atsiV moorthgiL ,beW an moorthgiL on sotof sa sadot ed o£Ã§Ãazilausiv an mecerapa euq sotof sa ,otnatroP .aigoloncet With version 2.1, Lightroom for mobile support manually controls shutter speed, ISO and focus distance on devices running versions of Android 5.0 (lollipop) and later. later. photo selected from the Camera Roll now opens in Camera Roll edit view where you can apply Crop, Presets, and Adjustments. (Right) Processed raw HDR image in the Loupe view When you trigger the capture button in the new High Dynamic Range (HDR) mode to capture a high-contrast scene, Lightroom for mobile automatically does all the processing in the background to create a raw HDR image: Lightroom mobile analyzes your scene to determine the appropriate spread of exposure values to capture multiple exposure-bracketed images. This allows you to preview your photo at the desired crop ratio even before you capture it. The Copy to Lightroom dialog displays the progress and notifies you when the copying process is complete. Ã Ã Cycle through your collection to quickly rate and flag your photos. Switch to the Effects panel of the Develop module. iPhone 6 DNG profile is not supported in the current version of Lightroom desktopÃ Â(Lightroom CC 2015.6/Lightroom 6.6). Cure pet eye effect in photos. If necessary, choose the photos that you want to import. Boundary Warp in action; adjusting the slider from 0 (above) to 100 (below) You can use Boundary Warp together with the Auto Crop setting. Auto white balance lock. For details, see Apply adjustments. See these resources: Supported camera models Supported lens profiles Issues fixed in this release of Lightroom Lightroom for mobile | iOS 2.6 | December 2016 This release of Lightroom for mobile iOS rolls out the following new features and improvements for iPhone and iPad. Now, you can go to the Adobe Stock Contributor portal to tag the uploaded images and submit them to Adobe Stock for moderation. Set White BalanceÃ ÃR. The resulting raw HDR file is similar to the type of file you would get when using the HDR merge functionality within Lightroom CC on your desktop. For details, see Apply local adjustments to linear or radial gradients. Direct control to adjust Noise Reduction and Enhanced in this version of Lightroom for mobile (iOS) When editing your photo in the Magnifying View > Edit pane, you can now swipe up on the screen to display the Light, Color, and Effects menu controls. (iPad) In the Edit pane menu in the Magnifying Glass view, tap Accordion Details. Add the new Camera Lightroom widget to directly access the camera in the app. Support for new cameras and lenses Enhanced in this version of Lightroom for mobile iOS For a complete list of supported cameras and lens profiles, see these resources: Supported Camera Models Supported Lens Profiles Solved an issue that some users were experiencing when importing images. Reduce the amount of mist or mist in a photo. To set this preference: Choose Edit > Preferences. Selected photos F. Capture interface options. Specify Lightroom mobile sync location Enhanced in this version of Lightroom In the Lightroom mobile preferences tab, you can now choose a preferred location on the Lightroom desktop to sync photos with Lightroom for mobile and also specify a subfolders structure formatted by capture date of image. (Android) Support for capturing high-contrast scenes in HDR mode is already available on: Samsung S8, Samsung S8+, Samsung S7, Samsung S7 Edge, Google Pixel and Google Pixel XL mobile devices only. You can see a quick preview of the panorama and make adjustments to it before the merged image is generated. Get instant access to the camera in the Adobe app by enabling the Lightroom widget for Mobile Notification Center. Read on for a quick introduction to these resources and links to resources that offer more information. Importing photos from Camera Roll or Gallery in Time view mode. Capture settingsN. Direct controls to adjust noise reduction and in your photos. Adjustment of the corresponding camera profiles applied to the appearance of the JPG files generated by the camera. Tapping the Lightroom Camera widget launches the Lightroom app and takes it directly to the camera function the application. Fixed an issue that caused a crash for some users in cutaway mode. Automatically creates µ views on monitor resolution. For more details, see Edit photos. You cannot apply this run manually. (Left) Auto mode; (A µ right) Pro A mode. For optimal performance, many development ³ operations can now make use of the GPU. Now, you cannot move the Pen in S to the left or right through the device screen to adjust the selected hue. You cannot add, reorder, or remove tracks in the Music panel. Improvements in crops: Cut the perfect photo with a redesigned experience that lets you adjust, align and straighten automatically quickly. Here are the features: Supported Camera Models Supported Lens Profiles µ fixed in this version of Lightroom for mobile (iOS) 2.7 and Lightroom for mobile (Android) 2.3 versions µ new features and improvements in the user interface. Here are some examples: Match the appearance of a photo for predefined creation. Mobile Lightroom | Android 3.0 | July 2017 This Lightroom for mobile (Android) release implements a new user interface, support for new cameras and lenses and general stability improvements. In the Preferences dialog, select the Performance tab. By default, all photos in the source folder are imported. Support for touch-enabled computers The new one in this version of Lightroom Lightroom now offers a touch-enabled workspace experience. This overlay allows you to not detect the overexposed Areas before capturing the shot and adjusting the display or composition Show Highlight Crop in the Live Capture Scene (Lightroom for iOS ³M on iPhone7 Plus) Direct Controls for Reducing Rod and Sharpness New in this version of Lightroom for Mobile (iOS) for mobile (iOS) now features direct controls to sharpen your photo and bring details in them. Lightroom lets you preview the merged file and adjust the thawing amount before adding it as a DNG file to your cat.
